About Me

Final-year Computer Engineering student with a strong interest in Data Analysis and Business Intelligence. Skilled in SQL, Microsoft Excel, Python (Pandas & NumPy), and Power BI. Passionate about cleaning, analyzing, and visualizing data to support better decision-making. Eager to start my career as a Junior Data Analyst, apply my analytical skills, and continue learning in a professional environment.

PROJECTS

NBA Data Analysis Project

- Collected and analyzed NBA player and team data using SQL and Python.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) with Pandas.
- Built visualizations to identify trends and compare player performance.
- Applied statistical hypothesis testing (Shapiro, T-test, Mann-Whitney U, and ANOVA) to validate analytical findings.
- Worked with SQLite databases and generated analytical reports to support data-driven insights.

Retail Sales Data Analysis

- Cleaned and preprocessed retail sales data using Python and Pandas.
- Performed exploratory data analysis (EDA) to identify sales trends, customer behavior, and product performance.
- Designed and organized datasets for efficient analysis and reporting.
- Built interactive dashboards in Power BI to visualize key business metrics and sales performance.
- Applied statistical analysis and machine learning techniques to generate actionable business insights.
